

PROJECTORS IN CLASSROOMS

At KIET, most classrooms are equipped with smart boards, and the remaining ones are facilitated with projectors to ensure a technologically enriched learning environment. This integration of digital tools enhances the teaching-learning process by enabling the use of visual aids, multimedia content, and interactive presentations. Projectors play a vital role in making complex concepts easier to understand, thereby improving student engagement and comprehension. They also promote collaborative learning and provide access to a wide range of educational resources, including online platforms and digital libraries. Additionally, this setup offers flexibility in teaching methods, supports personalized learning, and allows real-time feedback. The use of such technology not only benefits students but also aids in the professional development of teachers. Overall, the initiative reflects KIET's strong commitment to leveraging technology for better academic outcomes and a more effective educational experience.
