KIET Backup Electric Supply

Kakinada Institute of Engineering Technology (KIET) ensures uninterrupted power availability through a reliable backup electric supply system. The campus is equipped with three high-capacity generators, rated at 160 KVA, 125 KVA, and 125 KVA respectively. These generators automatically activate during power outages, providing seamless power to essential facilities and critical infrastructure. This robust backup system is meticulously maintained and regularly tested to ensure optimal performance, guaranteeing that academic activities and campus operations continue smoothly without any disruption. The backup electric supply underscores KIET's commitment to providing a dependable and resilient energy infrastructure for its community.
