Green campus initiatives

After the establishment of the college, the area has been sculpted into a greener space by local bodies, with dedicated teams involved in every venture. When we visit the KIET campus, we can experience aesthetic and elegant buildings, splendid lawns, spacious sports grounds, and a lush green environment that is highly conducive to the teaching-learning process.

The KIET campus boasts a canopy of trees and a variety of plants that contribute to a pollutionfree environment, safeguarding the health and well-being of all its inmates. The expansive lawns and tree-lined paths provide shade and a beautiful ambiance across the campus. Utmost care is taken to develop and maintain this green landscape through the dedicated efforts of trained gardeners and a supervising team who look after its ongoing development and upkeep.

NSS Students Contribution

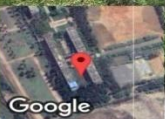

Additionally, NSS (National Service Scheme) students frequently take the initiative to maintain cleanliness across the campus. Their consistent efforts in preserving the serene and eco-friendly environment are highly appreciable.
