

Digital Learning and Seminar Infrastructure at KIET to watch MOOCs

Date:15-06-2025

KIET is committed to integrating technology with education to enhance student learning outcomes. All classrooms are equipped with **85-inch** smart boards and 2000W high-clarity audio systems, enabling students to seamlessly access MOOCs (Massive Open Online Courses) through government-supported platforms like SWAYAM and SWAYAM PRABHA. These resources allow students to learn from top institutions across the country, while faculty members provide guidance to help them understand concepts and gain practical insights.

In addition to smart classrooms, KIET boasts 2 fully equipped seminar halls and 4 large multipurpose halls, which serve as venues for guest lectures, workshops, training sessions, and academic events. These spaces support a vibrant learning ecosystem and encourage active participation in co-curricular and extra-curricular activities.
