### **SMART CLASSROOMS/LCD PROJECTORS/INTERNET CONNECTION**

KIET provides a technology-rich learning environment designed to enhance both teaching and learning experiences. Most classrooms are equipped with **85-inch smart boards** and **2000W high-clarity audio systems**, allowing for interactive lessons, dynamic multimedia presentations, and effective communication between faculty and students. The remaining classrooms are facilitated with **LCD projectors**, ensuring that all teaching spaces are equipped with modern instructional tools. This setup promotes personalized learning, boosts student engagement, and simplifies the understanding of complex concepts through visual and interactive content.

To support this digital ecosystem, KIET offers **uninterrupted high-speed internet access** through a **1 Gbps Reliance network**, backed by a well-maintained **server room**. This robust connectivity enables seamless access to online learning platforms, educational resources, virtual labs, and video lectures from top institutions across the country. The integration of these advanced technologies reflects KIET's commitment to delivering quality education through innovation and digital empowerment.
