ONLINE THEORY AND PRACTICAL CLASSES

The institution is well-equipped with **smart classrooms** featuring **85-inch smart boards**, **LCD projectors**, **high-clarity audio systems**, and **high-speed 1 Gbps internet connectivity**, ensuring smooth and interactive online teaching whenever it is needed. Faculty members use various digital platforms such as **Google Meet**, **Zoom**, **Microsoft Teams**, and **Google Classroom** to deliver lectures, share study materials, conduct assessments, and interact with students in real time.

For practical classes, virtual labs and simulation software are used to replicate real lab environments. Departments also use screen sharing and demonstration tools to explain experiments and procedures effectively. A dedicated **server room** and **IT support team** ensure seamless technical support during online sessions.

These facilities allow uninterrupted teaching even during unforeseen situations like pandemics and support blended learning, making KIET fully capable of conducting high-quality online education.
