### **MOOCs Facility at KIET**

At Kakinada Institute of Engineering and Technology (KIET), we strongly encourage students to enhance their learning beyond the classroom by participating in Massive Open Online Courses (MOOCs). Recognizing the global shift towards flexible and personalized education, KIET has created an enabling environment where students are supported and motivated to pursue these valuable learning opportunities.

Students have successfully completed a wide range of certified courses through reputed platforms such as NPTEL, Eduskills, etc. To ensure seamless access, KIET provides:

- Well-equipped computer labs with high-speed internet
- Dedicated MOOC coordinators and faculty mentors for guidance
- Time flexibility and academic credits (where applicable) for recognized courses
